

ABOUT US

CIR provides detailed market analysis and forecasting of the trends, technologies and opportunities in the telecom and data communications components and modules market. Since it entered the market in 1979, CIR has produced dozens of reports that have tracked the cutting edge of the communications sector with a special focus on emerging technologies and high bandwidth networking. Our focus is on supplying our customers with the most comprehensive and detailed market data available in the sectors that we follow.

Buy two reports and receive 25% off your order

OR

Buy two reports and receive a third report free

Why CIR?

CIR reports provide both qualitative appraisals and quantitative analyses. Our forecasting data offers a granularity that meets the requirements of this diverse market. Our data collection methodology examines factors such as shipment data, network topology, financial results, real estate statistics, technology adoption patterns and pricing trends. Our market analyses are formed through discussions with industry participants throughout the value chain balanced off against over 25 years of tracking the communications sector. When a company purchases a CIR report or engages our custom consulting solutions they receive a carefully constructed and finished product that reflects the market's reality.

CIR works with established and start-up companies; industry giants and niche players; as well as market leaders and new entrants. Companies rely on CIR reports and consulting services because the forecasts are credible, the coverage is balanced and the insights are rock-solid. Leaders of strategic planning, marketing, sales, engineering and finance represent CIR's user base. CIR also offers services to the financial community, addressing the needs of analysts, money managers and venture investors who seek the level of enlightened analysis for which CIR is recognized.

CIR—The place to turn for comprehensive analysis and market forecasting of telecom and datacom module and component opportunities.
